## Notes

This finding aid describes materials on microfilm held by the Kansas Historical Society. Materials may be used in the State Archives and Library during regular research hours. Support for telephone, mail, and online reference and research is limited.

In a continuing effort to improve the completeness and accuracy of finding aids, revisions are made as more or new information becomes available. Consequently finding aids in paper format, on microfilm, and on the Society's web site may differ slightly.

Descriptions are often based on a preliminary inspection of the material. As such, they may contain misspellings or other inaccuracies based on folder headings and other sources within the materials. As the collections are arranged and as time permits, these finding aids are improved and corrected. If you spot an error, please feel free to report it to the reference staff or an archivist.

## *History of the Darby Corporation*

Harry Darby, Sr., started the Missouri Boiler Works Company in Kansas City in 1895. Later he moved the firm to Kansas City, Kansas, and changed its name in 1904 to the Darby Products of Steel Plate Corporation. After Darby's death in 1923, his son — Harry Darby, Jr. — bought the company and established Darby Steel Company. The firm grew steadily until the Great Depression of the 1930s, when Darby was forced to lay off half his workforce. Despite setbacks, in 1938 Darby purchased the Kaw Steel Construction Company which was in bankruptcy. From the two firms, he formed the Darby Corporation.

In World War II, the Darby Corporation made bombs and other war materiel, but it was best known for its amphibious landing craft, known as LCTs (Landing Craft, Tanks) and LCMs (Landing Craft, Mechanized). Production increased to one ship per day or approximately 1400 for the duration of the War. Ships were floated down the Kansas, Missouri, and Mississippi rivers to New Orleans for launching. The military used Darby manufactured craft in the invasions of Italy, France, and islands in the Pacific Ocean. The company was also a major producer of railroad locomotives and 1000 pound bombs. At its height, the Darby Corporation was one of the largest steel plate manufacturing enterprises in the United States.

After the War, the company continued to fabricate steel plate and other products, particularly water towers and railroad equipment. In 1954 a subsidiary, Darby Railway Cars, incorporated in Kansas. The Darby Corporation acquired Leavenworth Steel Company and opened a subsidiary plant in Coffeyville, Kansas. The Darby Corporation closed in 1989, two years after the death of Harry Darby, Jr.

## *Scope and Contents of the Records*

This description is based primarily on box descriptions and labels augmented by some verification as the records were re-boxed. As additional archival work is performed on this collection, descriptions will undoubtedly become more complete and accurate. The information presented herein should be taken as preliminary and incomplete.

The records appear to have been organized into broad areas that have been incorporated as archival series in this finding aid: administrative records, personal papers of Harry Darby, "archives" records, accounting records, payroll records, engineering records, railroad cars records, and Leavenworth Steel records. More details about each of these series are found in the Detailed Description of the Records section of this register.

The largest series, and clearly the focus of this collection, is the Engineering Records, series 6. These typically consist of orders, specifications, drawings, materials lists, and related documents. These records relate primarily to water towers and related structures and other kinds of pressure vessels.

Closely related to the Engineering Records are the Railroad Cars Records, series 7. These files contain similar items as the Engineering Records series but relate to rail cars, railroad equipment, and automobile racks on rail cars.

Separate from the records of the Darby Corporation in Kansas City are the engineering work orders and project files for jobs performed by the subsidiary Leavenworth Steel Co. in its Leavenworth and Coffeyville, Kansas, plants. Included are corporate minutes for Leavenworth Steel Company.

The collection also contains a small quantity, five cubic feet, of personal papers and files of Harry Darby, Jr. However, most of Harry Darby's personal papers, 1925 – 1985, 513 feet, were donated to the Dwight D. Eisenhower Presidential Library (Abilene, Kans.) At the present time (2009), access to the personal papers at the Eisenhower Library is closed pending processing.

The Eisenhower Library also holds 168 feet of Darby Corporation records for the period 1942 – 1946. At the present time (2009), access is closed pending processing.

## *Detailed Description of the Records*

*Archival records are typically organized by series, a group of records that has a common element or function and a distinct organizational structure of its own, for example Correspondence Files, arranged chronologically, or Registers of Military Enlistments, arranged by regiment. Within series, records may be further organized by subseries, such as Letters Received within the series Correspondence Files; or arranged into volumes; folders; or items.*

## **Series Descriptions**

*NOTE: This description is based primarily on box descriptions and labels augmented by some verification as the records were re-boxed. As additional archival work is performed on this collection, descriptions will undoubtedly become more complete and accurate. The information presented herein should be taken as preliminary and incomplete.*

No attempt has been made at this time to physically rearrange the boxes into series. Researchers will need to consult the box contents spreadsheet to determine the shelf location of desired material.
